W. N. T. C. Campus Station

Arnold Garavito
Station Manager

The campus radio station can proudly point to its past and expected future. Now in its sixth year, it is an independent, self-supporting organization which shares its program, reaching approximately 100,000 listeners from Clark College and the State University Teachers College. Its purpose is twofold, to provide for the students the finest in enjoyable learning, entertainment, and to serve as a training ground in public relations, management, and radio engineering.

A most popular feature with the students has been the station's policy of broadcasting as many student athletic contests as possible. WNTC has set a precedent by broadcasting all home and away Clark basketball games as well as most soccer, basketball, and baseball home games. The quality of entertainment has been enhanced by the addition of a modern sound to the station's equipment.

The Board of Directors, comprised of the heads of the various station departments and the station manager, serves as a control and policy-making group for the benefit of the station.
